## PROFILE

I'm a front End developer, with skills in UI design and technical writing, who enjoys building interactive web pages that solve human problems. with a background in Customer service, Tech training & support, content writing, Project management. I'm able to add value and build a dynamic career by developing scalable tech solutions that address specific user needs. I'm always ready to learn and improve. i have worked with my teammates and team leaders to achieve organizational goals. I deliver on time. so far i have learnt a lot in other to gather enough knowledge to build scalable, reusable components with high functioning capacities using react js.

I'm able to manage states, call API and file structuring. I'm also able to make effective use of git and it's commands. i have also contributed to an open source project that's currently ongoing.

## EXPERIENCE

### Frontend Developer
wHTa Networks | Nairobi, Kenya

📅 Aug 2024 - Present

At wHTa Networks I worked as a Frontend Developer. I guide some of my colleagues most especially junior developer's to always follow React best practices. Here, I reviewed code's, design, and provide the best ways to solve critical issues.

### Volunteer Frontend Developer
Evolve Tech | Lagos, Nigeria

📅 May 2024 - Present

At Evolve I initially volunteered as a contractor but later got converted to be the front-end lead.

### Frontend Developer
Miatos Solutions | Lagos, Nigeria

📅 Dec 2023 - Jul 2024

I worked as a contractor while I was at Miatos Solutions
